

# Sheshan Raj V

09080520887 | vsheshanraj6@gmail.com | Salem, Tamil Nadu

---

## Objective

---

I'm Sheshan Raj V and I am currently seeking a challenging position in a reputed organization where I can learn new skills, expand my knowledge, and leverage my learnings.

## Experience

---

### **uSiS Technologies | Coimbatore, TamilNadu** **Junior Web Developer | 01/2023 - Present**

- Building and maintaining websites using HTML, CSS, and JavaScript. Creating websites that are optimized for various devices and screen sizes using responsive design techniques. Developing user interfaces and implementing designs using front-end frameworks such as React. Assisting with server-side programming and database management using technologies like Node.js and MongoDB. Identifying and resolving technical issues in web applications, including debugging and testing.

### **SKS Hospital | Salem, Tamil Nadu** **Designer | 07/2021 - 08/2022**

**Digital Marketing Department → Designer with Figma Toolkit:**

I'm the digital marketing department designer at SKS Hospital from Salem. In the Figma tool, I created a template for a hospital specialty. I'm also familiar with camera operation because I'm conducting doctor interviews and patient testimonials.

## Skills

---

Certified React Native Developer (Guvi), Certified HTML & CSS Developer (Guvi), Certified Python Developer (Guvi), Certified React.js Developer (Guvi), Certified Java Script Developer - Beginner (Guvi IIT)

## Education

---

### **Jairam Arts & Science College | Salem, Tamil Nadu** **Bachelor of Commerce and Computer Application | 04/2020**

Commerce and Computer Application, Database Management System, Relational Database Management System, Microsoft office.

## Personal Projects

---

- **UT Timelog → with API Integration and TimeLog:**

I architected the both frontend and backend for the project. I created the project in scratch from the design to the actual implementation of the software. This project is the company's CRM for keeping track of staff login/logout times and tracking the tasks that supervisors have delegated to them.

- **E-Commerce Website → with API Integration and Shopping Cart :**

I architected the full frontend for the project I created the React project from scratch from the design to the actual implementation of the website. This website accept the requests to the API and analysis the responses and prints the results in a shopping cart format. For state management I used Redux Tool kit for this project.

- **ToDo Application → Vannilla JavaScript:**

From the design to the actual implementation of the application, I created the Vanilla JavaScript project from the ground up. This Todo app is used to keep you from forgetting things, to prioritise tasks, to manage tasks effectively, to use time wisely, and to improve time management and workflow.

- **Digital Innovation Website → with Bootstrap and Html & Css:**

From the design to the actual implementation of the website, I created the Digital Marketing Website from the ground up. This website was created using HTML, CSS, and Bootstrap. This is also a Informative website for Digital Marketing.
