Sheshan Raj V

09080520887 | vsheshanraj6@gmail.com | Salem, Tamil Nadu

Objective

I'm Sheshan Raj V and I am currently majoring in the field of Computer Science. I love the field of computer science as it involves bit of every other field. I love learning new technologies. I am a budding MERN full-stack developer. I have now completed the Full-Stack course. I have done many projects which are listed below, which gave me professional experience in the field of computer science. I am also familiar with the range of Python.I worked on a (Habits Financial App) mobile app project in React Native as well as a shopping cart E-Commerce project in Next.js.

Experience

uSiS Technologies | Coimbatore, TamilNadu
Junior Web Developer | 01/2023 - Present
Building and maintaining websites using React.js, ReactNative, Node.js, Express.js, SQI and Sequlize. Creating websites that are optimized for various devices and screen sizes using responsive design techniques. Developing user interfaces and implementing designs using front-end frameworks such as React. Assisting with server-side programming and database management using technologies like Node.js and MongoDB. Identifying and resolving technical issues in web applications, including debugging and testing.

SKS Hospital | Salem, Tamil Nadu
Designer | 07/2021 - 08/2022
Digital Marketing Department --> Designer with Figma Toolkit:

I work as the department designer for digital marketing at SKS Hospital in Salem. I made a hospital speciality template using the Figma tool. Because I perform doctor interviews and patient testimonials, I am very proficient with operating a camera.

Education

Jairam College | Salem, Tamil Nadu
Bachelor of Commerce and Computer Application | 07/2019
Commerce and Computer Application, Database Management System, Relational Database Management System, Microsoft office.

Personal Projects and Real-Time Projects

- **Habits --> with ReactNative and Sequelize:**

I'm actively engaged in developing the Habits Financial mobile app, catering to both Android and iOS platforms, using React Native for cross-platform compatibility. The incorporation of Node.js and Sequelize ORM ensures efficient backend operations and seamless data management. This ongoing project underscores my expertise in crafting versatile financial solutions by leveraging modern technologies and cross-device capabilities.

- UT Timelog --> with API Integration and TimeLog:

I architected the both frontend and backend for the project. I created the project in scratch from the design to the actual implementation of the software. This project is the company's CRM for keeping track of staff login/logout times and tracking the tasks that supervisors have delegated to them.

- JWT-Token --> with useFormik and React.js:

I've completed a sign-in and sign-up project utilizing cutting-edge technologies. By leveraging the power of Formik for form management and React.js for the frontend, coupled with Node.js and MongoDB for backend data management, I've developed a secure and efficient authentication system that enhances user experience. This project demonstrates my skill in building end-to-end solutions using modern tech stacks.

- E-Commerce Website --> with TypeScript and Next.js :

I've successfully wrapped up an e-commerce project using Typescript and Next.js. By harnessing the benefits of static site generation and server-side rendering, I've created a high-performance online shopping platform with enhanced SEO capabilities. This project showcases my expertise in building efficient and scalable web applications with modern technologies.

- Dr.Kavi's Womens Care Center (Real Time) --> with TailwindCss and Email.js :

I've successfully concluded a real-time project for an infertility hospital website, employing React.js for building interactive user interfaces. The integration of Email.js enhances real-time communication, providing patients with a seamless way to connect with the hospital. This accomplishment highlights my capability to create responsive healthcare platforms that leverage modern technologies for effective patient engagement.

- ToDo Application --> Vannilla JavaScript:

From the design to the actual implementation of the application, I created the Vanilla JavaScript project from the ground up. This Todo app is used to keep you from forgetting things, to prioritise tasks, to manage tasks effectively, to use time wisely, and to improve time management and workflow.

- Digital Innovation Website --> with Bootstrap and Html & Css:

From the design to the actual implementation of the website, I created the Digital Marketing Website from the ground up. This website was created using HTML, CSS, and Bootstrap. This is also a Informative website for Digital Marketing.
